 maheshm8 Digital Resume maheshmb8 maheshmb8

Profile

BI Manager with over **12 years of experience** specializing in high-performance analytics architecture and AI-driven automation. Currently leading a **9-member team** to eliminate operational silos across **Supply Chain, Merchandising, Digital Ops, and Marketing** through scalable, metadata-driven frameworks and computer vision solutions. Proven track record of delivering **\$6M+ in savings** and reducing **1,800+ annual manual hours** by transitioning functions like **Fraud Prevention, Loyalty, and Finance** toward self-service ecosystems and automated governance. Expert at bridging the gap between US leadership goals and technical execution to drive reporting longevity in global retail environments.

Projects

Pose Orientation Engine for Retail Analytics 09/2025 - 12/2025
Developed an end-to-end **Computer Vision** pipeline using **MoveNet** and **CLIP (ViT-B/32)** to automate image orientation classification (front/side/back). By engineering **40+ geometric features** and a **LightGBM multiclass classifier** with **PCA**, the system enabled advanced predictive analytics beyond standard reporting. This innovation automated metadata extraction, reducing manual effort by **200+ hours annually**.

Broken Image Detection & Engineering 01/2025 - 02/2025
Developed a production-scale **Computer Vision** pipeline to identify broken, duplicate, and low-quality images in retail catalogs. The system utilizes **perceptual hashing (pHash)**, **Laplacian variance**, and dominant color analysis to automate visual audits. Engineered with **multithreaded processing** and HTTP backoff strategies, the solution ensured high data integrity while reducing annual manual effort by **700+ hours**.

Retail Audit Automation Engine 10/2025 - 03/2026
Engineered an enterprise data reconciliation pipeline to automate compliance audits for **merchandising and buying operations**. The system ingests nested payloads via **Freshservice REST APIs**, structures unorganized inputs into Pandas DataFrames, and cross-references transactions against a **Snowflake** data warehouse. By processing a matrix of **50+ custom checkpoints** (matching item IDs, costs, and dates) using parallel thread pools and localized **DuckDB** relational joins, the solution isolates workflow anomalies and auto-generates multi-sheet exception scorecards, reducing annual manual auditing effort by **1,500+ hours**.

PagePulse, SEO Automation 06/2025 - 07/2025
Developed a **Python (Tkinter)** desktop tool to automate high-volume SEO metric retrieval, replacing manual API workflows and spreadsheet lookups. The application features a **GUI for bulk URL processing**, extracting impressions, clicks, and CTR into structured Excel reports. By implementing **rate-limiting, batching, and progress tracking**, the tool accelerated analysis for non-technical users and reduced annual manual effort by **500+ hours**.

Work Experience

Saks Global, Manager, BI & MNR Analytics 12/2024 - Present | Bangalore, India

- Team Leadership & Efficiency:** Led a **9-member BI team** supporting Planning, Replenishment, and Digital Ops; delivered 6+ cross-functional initiatives saving **1,800+ hours** of annual manual effort via automated intake and reporting.
- AI Innovation:** Spearheaded an **AI-driven image and pose analytics** solution, leveraging computer vision to introduce advanced predictive use cases beyond traditional retail BI reporting saving **200+ hours**.

- **Scalable Analytics Framework:** Architected a metadata-driven engine using **Python (Streamlit)** and **Snowflake** with dynamic SQL and server-side caching; transitioned the org to a high-performance architecture saving **700+ hours**.
- **Operational Impact:** Engineered internal Python analytics apps and automation tools that empowered teams to self-serve, **eliminating 20+ tickets per month** and significantly reducing BI dependency.
- **Audit Automation:** Built a Python-based framework using **anomaly detection** to identify high-risk claim approvals, providing a systematic approach to reducing financial leakage and manual audit overhead.
- **Strategic Stakeholder Management:** Partnered with US leadership to define core metrics and translate ambiguous business problems into **scalable, automated solutions** through prioritized BI intake.
- **Governance & Team Development:** Strengthened continuity by introducing shared intake tracking and cross-training, which reduced delivery risk and minimized stakeholder escalations.
- **Technical Mentorship:** Mentored analysts to simplify complex solutions, embed **self-auditing checks**, and prioritize ongoing stakeholder engagement to ensure reporting longevity.

Stock Vertex Ventures, Team Lead 

02/2024 – 11/2024 | Bangalore, India

My Role - Lead and collaborate with the team to build, backtest, and deploy live algorithmic trading strategies for stocks.

- Led 4 analysts on back testing and live testing of algo strategies.
- Developed back testing algorithms in Python using TA-Lib (**ROI: 120%**) & built a Streamlit tool for strategy dashboards.
- Deployed live algo trading code for NSE (**ROI: 54%**).
- Built a local SQL DB for faster execution and reduced AWS dependency.

Saks Global, Team Lead, Analytics 

09/2020 – 12/2023 | Bangalore, India

About Fraud Analytics Team – Detecting fraud, boosting revenue through trend identification and mitigation

- Led a successful team of 2 analysts, collaborating on multiple projects and **cutting false referrals by 35%**.
- Customer Risk Scorecard Tool: Holistic view of customers' risk, sales, returns, demographics, and address history across all channels [Tools - Tableau, Streamlit, Python, VBA and SQL](**saving approx. \$1M and 200hrs Monthly**)
- Promo-Code Reduction Analysis, identifying revenue-reducing promo-codes and tracking agents for corrective action. Detected and dismissed agent involved in collusion.(**saving \$900k**)
- Sizing Chart Optimization : Enhanced sizing charts for key catalogue categories by identifying high-return SKUs through SQL, Python, and data analysis, reducing returns (**Savings \$2M**)
- Carrier Data Integration - Implemented data ingestion for scan events from **8 carrier partners**, enhancing the company's ability to monitor and improve on-time delivery accuracy.
- Other Diverse projects: Missing Packages, Gift Card Fraud, Loyalty/Rewards Fraud, Database Management, Self-Serve Dashboards & mentoring/training [Tools -SQL] (**saving approx. 100hrs Monthly**)

Myntra, Associate, Trust and Safety 

10/2019 – 08/2020 | Bangalore, India

About T&S Team – focuses on combating fraud for online marketplace and Logistics Fraud.

- Built Anomaly Detection Modules - this helped the team track fraudulent patterns in customer accounts and related accounts [Tools - Python and SQL](**saving 150hrs Monthly**)
- Fake Returns Mitigation Report- Identified multiple frauds at logistics and presented to leadership on a geo-Heat map & high risk Zips - [Tools - Tableau, SQL and Python](**saving \$10k Monthly**)

Tesco, Senior Analyst, Fraud Prevention 

08/2016 – 10/2019 | Bangalore, India

- **Fraud & Compliance:** Spearheaded "Supervisor Authorization" protocols and trend monitors, reducing keyed-card fraud by **65%** and saving **£8k/week**, while engineering frameworks to detect internal embezzlement.
- **Technical Optimization:** Automated legacy reporting and chargeback mapping using **Python and VBA**, eliminating **14 manual hours weekly** and reducing process flaws by **95%**.

Amazon, Risk Investigator, TRMS 

07/2014 – 01/2016 | Bangalore, India

Early-career role focused on fraud detection

Education

MBA, Jain University

Supply Chain & Logistics Management

2016 – 2019 | Bangalore, India
